

## Atea AWS LZ Launchpad: Your 'Turn-Key' Solution for Cloud Modernization

The AWS LZ Launchpad is a platform-based approach, which offers a seamless transition into AWS, enabling businesses to focus on growth and innovation.

### Key Challenges Addressed

- Need for specialized architectural expertise.
- Long lead-times and significant investments for scalable, secure, and governed Landing Zones (LZ) in AWS.

### Our Delivery

Atea's AWS Landing Zone Launchpad is crafted with AWS's native services, solutions, and components, ensuring a proven, ready-to-deploy setup that adheres to industry best practices.

### Main Components

- Standardized Atea-templates with Opinionated Defaults
- Integration with Native AWS Services
- Automated Processes and CI/CD Pipelines
- Well-Architected Framework adherence
- Centralized Logging and Single Sign On-Based Access
- Real-Time Threat Detection

### Delivery Activities

- **Try Phase:** A 7-day trial with an optional 14-day extension to test and evaluate the LZ launchpad.
- **Buy Phase:** Decision-making on continuing with the full LZ launchpad, with pricing options available.

### Atea Service Advantages

- Extensive development by Atea's AWS experts
- Proven solution for customers
- Deployment within a few days

### Value Proposition

With Atea's AWS LZ Launchpad, customers gain platform-level capabilities without the need for one-time build competency, ensuring a scalable, secure, and enterprise-grade environment optimized for performance, reliability, and cost-effectiveness.
